EMN European Migration Network

The EMN Glossary improves comparability by enabling a common understanding and use of terms and definitions relating to asylum and migration. The Glossary draws on a variety of sources, but primarily on the legislation of the EU asylum and immigration acquis, and makes terms available in the majority of Member State languages.

This online version of the Glossary was updated in December 2015 with the addition of 29 new terms reflecting the most recent European policy on migration and asylum. This includes terms such as 'Hotspot Approach', 'emergency response system' and 'personal interview for international protection'. Almost 250 amendments of existing words were also made (e.g. correcting or updating translations and amending and updating definitions).

This online version of the Glossary is version 3.0, which was published in October 2014 and is available for download as an interactive pdf version by following this link: English [7 MB] .

The EMN Glossary version 2.0 was published in a number of EU languages, as well as Arabic. These language versions are available here: Deutsch [4 MB] , Español [4 MB] , Français [4 MB] , Italiano [3 MB] , Português [4 MB] and Arabic [7 MB] . A German language version of Glossary 3.0 is in production and will soon be available.

Analysis and Statistics

EASO's Early warning and Preparedness System (EPS) is a data collection system gathering information under indicators focussing on all key stages of the Common European Asylum System (CEAS). Countries provide monthly data to EASO within 15 days, with all 30 EU+ countries (EU Member States plus Norway and Switzerland) contributing.

As the CEAS is a complex process, the roll-out of the data collection is envisaged to proceed in stages: Stage II, launched in March 2014, focuses on the first instance in the asylum process and collects data under four indicators: applicants, withdrawn applications, decisions, and pending cases. Stage III, launched in September 2015, focuses on access to procedure, reception, Dublin and return.

In developing EPS indicators, every effort is made to make them as consistent as possible with existing migration statistics collected by Eurostat under Regulation (EC) No 862/2007 — EU statistics on migration and international protection.

- Skills and labour market integration of immigrants and their children in Sweden

Europe is facing a historical moment with one of the worst refugee crises in decades. Managing this emergency is complex but Europe has the experience and the capacity to cope. The OECD has been monitoring recent developments in migration movements and policies in OECD countries, and analysing integration policies of immigrants and their children into education and labour markets. Our work shows that migration, if well managed, plays a positive role in the economy spurring growth and innovation.

There are many Internet sites concerned with issues of migration and ethnic diversity. Some of the most significant are listed here, arranged in to six categories.

1. Regional migration research
2. Asylum-seekers, refugees, forced migration
3. Migration research centres
4. Migration and health
5. International organisations/migration policy
6. Statistical resources

1. Regional migration research

- **Asia Pacific Migration Research Network (APMRN):**
  APMRN carries out interdisciplinary research on the social and political aspects of international migration and the growing ethno-cultural diversity in the region. The site provides information on its projects, conferences and publications focusing on migration in the Asia Pacific region.

Immigrant Integration

Brain Waste & Credential Recognition | Children & Family Policy | Citizenship & Civic Engagement

see more...

Immigrant integration is the process of economic mobility and social inclusion for newcomers and their children. As such, integration touches upon the institutions and mechanisms that promote development and growth within society, including early childhood care; elementary, postsecondary, and adult education systems; workforce development; health care; provision of government services to communities with linguistic diversity; and more. Successful integration builds communities that are stronger economically and more inclusive socially and culturally.

WHAT IS MIPEX?

Migrant Integration Policy Index

38 COUNTRIES + 167 INDICATORS + 8 POLICY AREAS

The Migrant Integration Policy Index (MIPEX) is a unique tool which measures policies to integrate migrants in all EU Member States, Australia, Canada, Iceland, Japan, South Korea, New Zealand, Norway, Switzerland, Turkey and the USA.

167 policy indicators have been developed to create a rich, multi-dimensional picture of migrants' opportunities to participate in society. The index is a useful tool to evaluate and compare what governments are doing to promote the integration of migrants in all the countries.

To that end, the project identifies and measures integration outcomes, integration policies, and other contextual factors that can impact policy effectiveness; describes the real and potential beneficiaries of policies; and collects and analyses high-quality evaluations of integration policy effects.

Thanks to the relevance and rigor of its indicators, the MIPEX has been recognised as a common quick reference guide across Europe. Policymakers, NGOs, researchers, and European and international
